Global Development & Economic Performance

Interactive Power BI Analysis Across 229 Countries and 7 Regions

Prepared by: Atef Khalaf | Junior Business Intelligence Analyst

PART 1: DATA PREPARATION

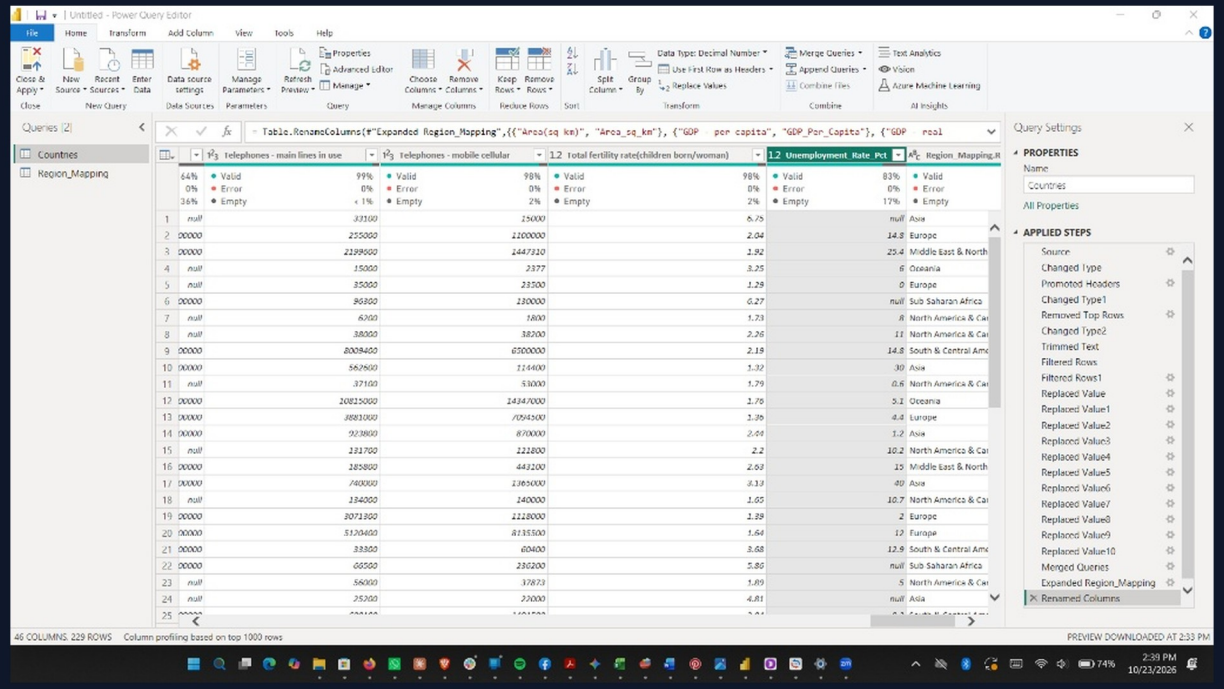

Power Query Pipeline Cleaned 229 Countries

Six Structural Fixes Applied

Schema & Delimiter: Parsed semicolon CSV and removed Row 2 schema text.

Filtered Aggregates: Excluded #European Union and 33 uninhabited islands.

Region Enrichment: Standardized 11 names and merged 7 global regions.

PARTS 2 & 3: DATA MODEL & DAX

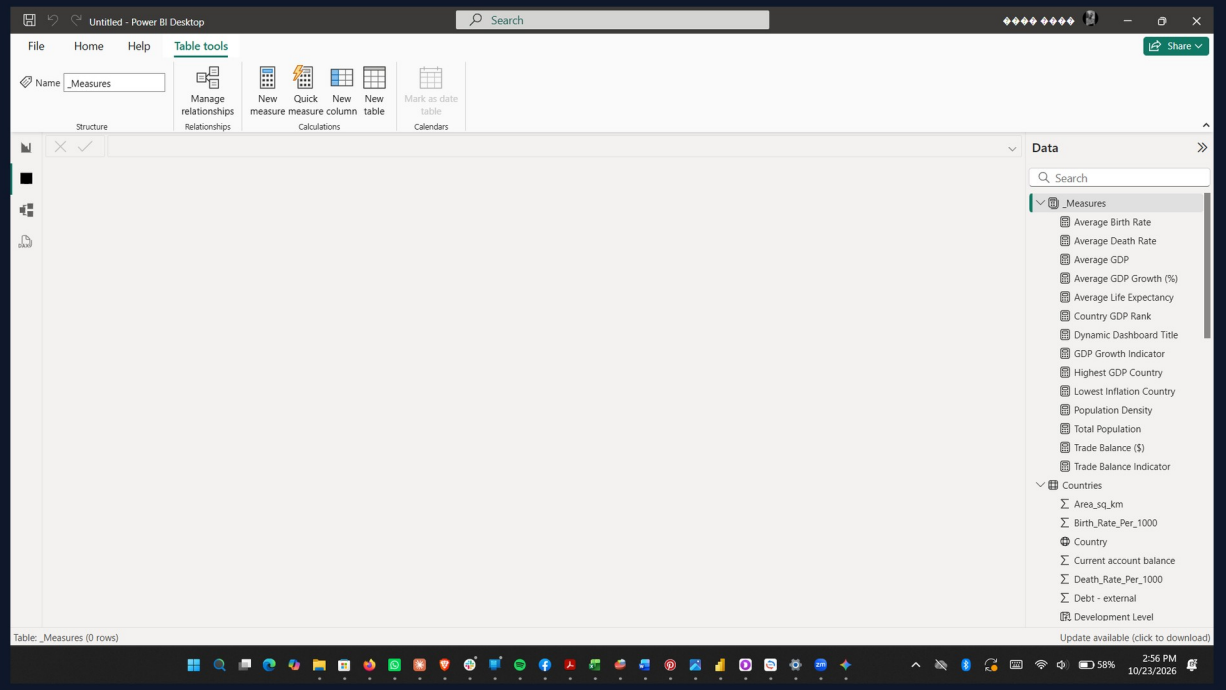

14 DAX Measures Power Dynamic KPIs

Model & Measure Architecture

Geographic Hierarchy: Configured Region -> Country for Azure Maps.

Four Classifications: Built GDP, Population, Development, and Growth tiers.

Dynamic Ranking: Used RANKX, TOPN, DIVIDE, and CALCULATE for KPIs.

PART 6: RECOMMENDATIONS

Three Strategic Priorities Guide Policy Action

1. Primary Healthcare

Target Infant Survival: Direct grants to maternal care in Sub-Saharan Africa.

Combat Infectious Disease: Expand HIV/AIDS treatment to lift workforce longevity.

2. Monetary Stability

Curb High Inflation: Tie aid to inflation targeting in >15% inflation states.

Restructure Public Debt: Reduce external debt burdens to restore investor trust.

3. Export Infrastructure

Reinvest Surpluses: Channel MENA and Asian trade gains into power grids.

Digital Connectivity: Expand broadband and rail to diversify export bases.
